Are the project teams ready to function within agile project management?

Did any other positions than Product Owners get any training?

Do you believe that the team should collaborate more or less?

How to get rid of waterfall cultural influence while setting up a large distributed Scrum?

Is the Scrum master a manager or can a manager become a Scrum master?

What estimated percentage of your current IT budget is allocated to each areas?

What organization strategies does a mobile banking application support?

Which work products would be part of the functional baseline?

Which would you consider to be a barrier to your organizations IT transformation efforts?

Why does digitalisation and smart matter to Infrastructure investments?

This Agile Process Guide is unlike books you're used to. If you're looking for a textbook, this might not be for you. This book and its included digital components is for you who understands the importance of asking great questions. This gives you the questions to uncover the Agile Process challenges you're facing and generate better solutions to solve those problems.

Defining, designing, creating, and implementing a process to solve a challenge or meet an objective is the most valuable role... In EVERY group, company, organization and department.

Unless you're talking a one-time, single-use project, there should be a process. That process needs to be designed by someone with a complex enough perspective to ask the right questions. Someone capable of asking the right questions and step back and say, 'What are we really trying to accomplish here? And is there a different way to look at it?'

This Self-Assessment empowers people to do just that - whether their title is entrepreneur, manager, consultant, (Vice-)President, CxO etc... - they are the people who rule the future. They are the person who asks the right questions to make Agile Process investments work better.

This Agile Process All-Inclusive Self-Assessment enables You to be that person.

INCLUDES all the tools you need to an in-depth Agile Process Self-Assessment. Featuring new and updated case-based questions, organized into seven core levels of Agile Process maturity, this Self-Assessment will help you identify areas in which Agile Process improvements can be made.

In using the questions you will be better able to:

Diagnose Agile Process projects, initiatives, organizations, businesses and processes using accepted diagnostic standards and practices.

Implement evidence-based best practice strategies aligned with overall goals.

Integrate recent advances in Agile Process and process design strategies into practice according to best practice guidelines.

Using the Self-Assessment tool gives you the Agile Process Scorecard, enabling you to develop a clear picture of which Agile Process areas need attention.

Your purchase includes access to the Agile Process self-assessment digital components which gives you your dynamically prioritized projects-ready tool that enables you to define, show and lead your organization exactly with what's important.
