When choosing a dissertation topic, it is important to select an area of research that aligns with your interests and passions. The School of World Art Studies and Museology offers a wide range of expertise among its faculty, who are all well-versed in various art disciplines. They can provide valuable guidance and mentorship as you navigate through the research process.

Now, let's dive into some examples of fascinating dissertation topics that you could explore at the School of World Art Studies and Museology:

### **1. The Influence of African Art on European Modernism**

This research project would examine the impact that African art had on the European Modernist movement during the early 20th century. By analyzing specific art pieces, artistic techniques, and cultural exchanges, this dissertation would contribute to a better understanding of the cross-cultural influences that shaped modern art.

### **2. The Role of Museums in Preserving Indigenous Cultures**

This topic would focus on the role of museums in preserving the cultural heritage of indigenous communities around the world. The dissertation would explore issues of representation, collaboration, and the ethical implications of displaying indigenous art and artifacts in museum collections.

### **3. Decolonizing Western Art History: A Critical Analysis**

This research project would critically analyze the Eurocentric narrative of Western art history and propose alternative perspectives that challenge dominant narratives. By examining the exclusion and marginalization of non-Western artists in traditional art discourse, this dissertation would contribute to a more inclusive and diverse understanding of art history.

#### **4. The Impact of Digital Technologies on Contemporary Art Practices**

This dissertation would investigate the ways in which digital technologies have transformed contemporary art practices. From social media platforms to virtual reality experiences, this research project would explore how artists have embraced and adapted to new technologies, and the implications of these changes for the art world.

These are just a few examples of the countless possibilities for dissertation topics at the School of World Art Studies and Museology. In addition to the academic support provided by faculty members, the school also offers access to extensive research resources, including libraries, archives, and specialized art collections.

Completing a dissertation at the School of World Art Studies and Museology is not only a fulfilling academic endeavor but can also open doors to future career opportunities. The skills gained through conducting original research, critical analysis, and written communication are highly valued in the art world, museums, and academia.

So, if you're ready to take your passion for art and museology to the next level and make a significant contribution to the field, consider pursuing your dissertation at the School of World Art Studies and Museology at the University of. The knowledge and experiences gained during this program will undoubtedly shape your future and leave a lasting impact on the art world.

Don't miss out on this incredible opportunity to immerse yourself in the world of art studies and museology. Apply now and embark on a transformative journey of research and discovery!

## The Role and Relevance of Stone Within Inca Culture: A Dissertation at the School of World Art Studies and Museology, University of East Anglia

by Steven Moore (Kindle Edition)

Few places ignite the fires of travel passion more than Machu Picchu, high in the Peruvian Mountains.

One crucial fact exists that does not get discussed enough. The importance of stone. Simply, and obviously, the citadel would not and could not exist without the ancient Incan architect's mastery of stone.

Stone as a material has for millennia played a significant role in the development of culture and civilisation the world over. Yet, nowhere is that more prevalent than within this most mysterious yet powerful of ancient civilisations, in which the

seemingly humble natural material of stone stakes a claim to be not only the physical building block of a culture, but a spiritual and metaphorical building block of an entire civilisation.

This book is a discourse about the role and relevance of stone within Inca culture. It's also a kind of travelogue detailing some of my own experiences exploring this beautiful and fascinating country whilst researching for my degree at university. Leaning on the works of legendary explorer Hiram Bingham, as well as renowned scholars Gasparini and Margolies, this book is an enjoyable and informative journey around some of the Incas' most famous monuments, which, without their mastery of stone, would never have existed, and likely, nor would the Incas themselves.
